

What I Claim Is:

1. A security portfolio comprising:
a folded sheet having first and second panels defined by a fold portion, each panel having an inside and an outside surface;
wherein the outside surface of the first panel includes an identification holder configured to receive a personal identification document related to security; and
wherein the first panel further defines an opening in the outside surface thereof for securing a second document.
2. The portfolio of claim 1, wherein at least a portion of the identification holder is transparent.
3. The portfolio of claim 1, wherein the identification holder is made of plastic.
4. The portfolio of claim 1, wherein the identification holder is configured such that a personal identification document fits at least partially within the holder.
5. The portfolio of claim 1, wherein the first panel further defines a second opening in the outside surface thereof for viewing a portion of the second document.
6. The portfolio of claim 5, wherein the second opening is a window.
7. The portfolio of claim 1, wherein the inside surface of the first panel is configured to removably secure the second document.
8. The portfolio of claim 7, wherein the inside surface of the second panel is configured to removably secure a third document.
9. The portfolio of claim 8, wherein at least a portion of the inside surface of the second

panel is transparent.

10. A security portfolio comprising:

a folded sheet having first, second, and third panels, each panel having an inside and an outside surface, wherein the first and second panel are defined by a first fold portion and the second and third panels are defined by a second fold portion;

wherein the inside surface of the first panel includes an identification holder configured to receive a portion of an identification document;

wherein the outside surface of the second panel is configured to removably secure a second document; and

wherein the inside surface of the third panel is configured to secure another portion of the identification document.

11. The security portfolio of claim 10, wherein at least a portion of the outside surface of the second panel is transparent.

12. The security portfolio of claim 10, wherein at least a portion of the identification holder is transparent.

13. The portfolio of claim 10, wherein the identification holder is made of plastic.

14. The portfolio of claim 10, wherein the identification holder is configured such that a personal identification document fits at least partially within the holder.

15. A security apparatus comprising:

a substantially solid surface portion, wherein the substantially solid surface portion is one of a travel document, a travel portfolio, a special event document, a special event portfolio, and

a security document; and

an identification holder adapted to be fastened to the substantially solid surface portion, the holder configured to receive a personal identification document therein, wherein the personal identification document is at least partially visible.

16. The security apparatus of claim 15, wherein at least a portion of the identification holder is transparent.

17. The security apparatus of claim 15, wherein the identification holder is plastic.

18. The security apparatus of claim 15, wherein the holder comprises one of a sheet or a pocket.

19. The security apparatus of claim 15, wherein the holder is fastened to the substantially solid surface portion by adhesive.

20. The security apparatus of claim 15, wherein a personal identification document fits at least partially within the holder.

21. A security apparatus comprising:

a folded sheet having first and second panels defined by a fold portion, each panel having an inside and an outside surface;

wherein the outside surface of the first panel includes an identification holder configured to receive a personal identification document related to security;

wherein the first panel further defines an opening in the outside surface thereof for securing a second document; and

a second document secured by the first panel, wherein the second document is one of a

travel document, a special event document, and a security document.

22. The security apparatus of claim 21, wherein the second document is a boarding pass.

23. The security apparatus of claim 21, further wherein the outside surface of the second panel is configured to removably secure a third document; and

further comprising a third document secured by the second panel, wherein the third document is one of an additional travel document, special event document, and a security document.

24. The security apparatus of claim 23, wherein the third document is a receipt.

25. A security apparatus comprising:

a folded sheet having first, second, and third panels, each panel having an inside and an outside surface wherein the first and second panel are defined by a first fold portion and the second and third panels are defined by a second fold portion;

wherein the inside surface of the second panel includes an identification holder configured to receive a portion of an identification document;

wherein the outside surface of the first panel is configured to removably secure a second document;

wherein the inside surface of the second panel is configured to secure another portion of the identification document; and

a second document secured by the first panel, wherein the second document is a travel document.

26. The security apparatus of claim 25, wherein the second document is a boarding pass.

27. A security portfolio comprising:

a folded sheet having first and second panels defined by a fold portion, each panel having an inside and an outside surface;

wherein the outside surface of the first panel includes means for holding a personal identification document; and

wherein the first panel further includes means for securing a second document.

28. The security portfolio of claim 27, wherein the outside surface of the first panel further includes means for viewing a portion of a second document.

29. A security portfolio comprising:

a folded sheet having first, second, and third panels, each panel having an inside and an outside surface, wherein the first and second panel are defined by a first fold portion and the second and third panels are defined by a second fold portion;

wherein the inside surface of the first panel includes means for holding an identification document;

wherein the outside surface of the second panel includes means for securing a second document; and

wherein the inside surface of the third panel includes means for securing another portion of the identification document.
